Video Editor and Post-Production-Producer with 10 years of experience creating digital, broadcast, and social media content across the academic, athletic, and tech industries, translating complex ideas into audience-engaged multimedia content.

PROFESSIONAL EXPERIENCE

Video Editor / Post-Production-Producer

Level1Techs — Richmond, KY | June 2021–Present

- Edit and produce long-form informational and entertainment content distributed to an audience of more than 530,000 YouTube subscribers.
- Manage the post-production pipeline, including production scheduling, missing-asset coordination, supplemental footage requests, and timeline/deadline delivery.
- Collaborate directly with on-screen talent and leadership to develop cohesive content by strengthening the core themes and restructuring complex material into digestible content.
- Obtains/Creates b-roll, graphics, audio, and external media assets to support technical concepts, while maintaining consistent production quality.
- Support marketing initiatives through branded media production and cross-platform content adaptation, bridging communication between on-screen talent and corporate desires.
- Averages 2 to 3 videos per week with a total of over 400 videos edited and produced so far.

Video Production Assistant

Eastern Kentucky University — Richmond, KY | Oct 2016–June 2021

- Planned and produced promotional media for television broadcasts, university websites, recruitment materials, and social media campaigns.
- Coordinated post-production workflows, including editing, asset management, review cycles, and digital archiving.
- Supported multi-department media initiatives under tight production deadlines to ensure brand cohesiveness.
- Managed weekly event shooting with fast turnaround production assignments, maintaining organized footage, media assets, and consistent quality.
- Contributed to creative development and execution of branded university content by connecting with the student population, staff, and faculty.

Broadcast Technician Assistant

EKU Athletics — Richmond, KY | Oct 2016–Nov 2019

- Supported fast-paced live broadcasts for ESPN+ and OVC Network coverage across football, basketball, baseball, softball, soccer, and volleyball with technical precision and team coordination.

- Operated cameras, audio systems, replay systems, and Tricaster live-switching equipment during live productions.
